S&WE Products Manager Carol Hanlon
U.S. Department of Energy
P.O. Box 30307 M/S 025
North Las Vegas, NV 89036-0307

S&WE Products Manager Hanlon:

I am writing to express my deep concern over the Yucca Mountain Project and the flawed process railroading it toward approval. We need to be leading the way to clean smart energy solutions not dangerous ones such as nuclear. In light of current events, how can the DOE consider nuclear a safe energy source when it is an easy target for terrorists. Let's look into renewables not nuclear. How can the Secretary of Energy be preparing to recommend Yucca Mountain for a high-level nuclear waste dump when thousands of public comments on the Draft Environmental Impact Statement still have not been addressed? Without a Final Environmental Impact Statement, a detailed transportation scenario, finalized Siting Guidelines, or a licensing rule, the Department of Energy lacks the basis for consideration of site suitability. The public cannot have confidence in any recommendation that arises from such a dramatically flawed process. I urge you to abandon the Yucca Mountain Project.

Sincerely,

Jenny Jankowski
